

## Project Bid

### CSCD350- Software Development Principles

**Team Name:** Team 404

**Dated:** 04/04/2023

**Canvas Group number:** Group 7

Name	Email id	Project Experience	Programming Language used
Justin Mitchell	jmittchell11@ewu.edu	Sound Board with embedded video player	Vanilla HTML, CSS, JS
Kevin Flannery	kflannery@ewu.edu	212 Project, 260 Project, 330 API Project	Java, Python, C
Trevor Stewart	tstewart12@ewu.edu	CS330 Networks Projects, CYK Algo in CS420, 350 Algorithms	Java, C#, Python, SQL
Kyle Wong	kwong15@ewu.edu	Networks Project, 210-212 Projects	Java, Python, HTML, C
Ethan Guerin	eguerin@ewu.edu	Network manipulation, Packet Creation, Server Traffic, 212 Projects	C#, C++, Java, Python,

**Choice of Projects (Brief 2–3-line description about the problem statement and type of project like a Mobile app/Webapp/Something else)**

**Project Choice 1(1<sup>st</sup> Preference):**

#### **Crowd Sourced recipe website**

A website that allows users to crowdsource recipes through a public rating/upvote system that takes in recommendations to existing recipes and changes based on public feedback.

**Project Choice 2(2<sup>nd</sup> Preference):**

#### **Movie/TV Show database/review platform**

We will create a database with media, and allow users to review the media, we would connect users to other media they may enjoy.

**Project Choice 3(3<sup>rd</sup> Preference):**

#### **Travel route planner**

How to get from point a to point b using buses, trains, planes, car, etc. Make stops at specified locations. Give time estimates, show distance between stops.

#### **Additional Remarks/ Inputs**

We as a group are interested in making a compelling, and interesting product for this class. We spent a lot of time working through our ideas, and it took a while to narrow down. We are generally very interested in these three projects, mostly because they all allow us some creativity and freedom in the way we want to design them.
